🐙 Abdallah Syaj   🔗 My Portfolio

Summary

Motivated Full Stack Web Developer with experience in both front-end and back-end technologies. Skilled in building responsive web apps, integrating APIs, and working with databases. Strong problem-solving skills, a solid understanding of software development practices, and a passion for learning. Experienced in writing clean, maintainable code in team settings.

Professional Experience

Software Engineer
2025/05 – present
Optimum Partners
Amman, Jordan

Worked as a Software Engineer at Optimum Partners, focusing on backend development with Python and FastAPI, and frontend using Angular. Contributed to DevOps tasks including Docker containerization and deployment workflows. Collaborated on building scalable and maintainable applications within agile teams.

Full-Stack Web Developer Trainee
2025/01 – 2025/05
Orange Coding Academy ↗

Completed intensive full-stack web development training, focusing on both frontend and backend technologies. Built dynamic web apps, implemented RESTful APIs, and integrated MySQL databases. Gained hands-on experience with HTML, CSS, JavaScript, React, Laravel, and Git, following Agile practices and responsive design principles.

IT Assistant & Data Entry
2024/02 – 2024/12
Zepter International Jordan ↗
Amman, Jordan

Provided technical support for hardware/software issues and assisted users with common tools like Microsoft Office. Handled data entry and ensured organized, up-to-date records.
